Locking system	KEY Lock (Cylinder lock)	Colour	Light grey RAL 7035 / Light blue RAL 5012
Number of compartments	2 x 2		

Product-specific benefits

- + Maximum stability** thanks to hinged doors mounted on the right in fulcrum pins with reinforcement pocket for greater protection against burglary (DIN 4547)
- + Sophisticated ventilation** with air vents at the top and bottom of the housing
- + Optimum hygiene** thanks to plain compartment shelves without raised edge to make it easier to clean the compartments thoroughly
- + Practical interior fittings** with hat rack, towel holder and clothes rack with three sliding coat hooks for each compartment
- + Individual equipment options** such as housing with an inclined top, dual compartments, benches or ventilation ducts for on-site forced ventilation
- + Secure locking option** with KEY Lock locking system, closing device for padlock or combination lock (other locking systems available on request)
- + Protected against dirt and corrosion** with bases or legs that are galvanised in addition to being powder-coated. Protect against corrosion, cover with a base also protects against dirt

OVERVIEW OF LISTA ACCESS SOLUTIONS

KEY Lock

Proven standard locking system

KEY Lock, our standard locking system with replaceable cylinders.

- **Manual opening/locking** with key
- Simultaneously lockable for multiple, as well as different, products with only one key or separately lockable with several keys
- Key availability guaranteed for years

CODE Lock

The modern solution with number combination

When locking with CODE Lock, the key is replaced by a number combination. A simple four to six-digit code is all that is needed to open the product.

- **Manual opening/locking** with number code
- Lock readout and programming with LISTA Access Software (option)

RFID Lock

Ready for the future: the solution with RFID Badge

In addition to the CODE Lock, the LISTA RFID Lock enables opening and locking via standard radio-frequency identification (RFID). It consists of a transponder in the lock and standard mobile RFID badges/cards/tags.

- **Manual opening/locking** via RFID badge or number code
- Most standard RFID badges/cards/tags can be used
- Lock readout and programming with LISTA Access Software (option)

AUTO Lock

The ultimate solution: automatic opening and locking

The LISTA AUTO Lock features the same functionality as our RFID Lock, however opening and locking take place automatically. With LISTA Access Software (option), time profiles can also be programmed in the lock or on the user for time-limited access for increased security.

- **Automatic opening/locking** via RFID badge or number code
- Most standard RFID badges/cards/tags can be used
- Locks automatically after a preset time or at the push of a button
- Lock readout and programming with LISTA Access Software (option)
- Time-limited access programmable via LISTA Access Software (option)
