

DRAWER CABINETS

DRAWER CABINETS WITH HINGED OR SLIDING DOORS

LISTA drawer cabinets with hinged or sliding doors are ideal for large and heavy stored goods. The doors enable tall items to be safely locked away and protected from dirt, damage and unauthorised access. The flexible inner partitioning options and a variety of locking systems ensure that you have the best solution for your needs – all with lots of clever details and a 10-year guarantee. Just as you would expect from LISTA.

Hinged doors: The hinged doors made of sheet steel have a 2-point bar lock and can optionally be used with the KEY Lock, CODE Lock or RFID Lock systems. The maximum opening angle is 235°.

RFID Lock: In addition to the CODE Lock, the LISTA RFID Lock enables opening and locking via standard radio-frequency identification (RFID). It consists of a transponder in the lock and standard mobile RFID badges/cards/tags. Manual opening/locking via RFID badge or number code.

Drawer safety device standard: Standard configuration including single-drawer blocking system

Pull-out and adjustable shelves: Made of sheet steel, pigeon grey, NCS S 4502-B. Pull-out shelves with sendzimir galvanised slat inserts (sheet steel profile), plain adjustable shelf. Thanks to the 25 mm increments in the vertical supports in the cabinet housings, different shelves can be built into the same housing in any sequence.

Drawer cabinet		Art-Nr.: 79.412.514.F	
Net weight kg	103	Drawers useful width mm	612
LISTA units	36 x 27 E	Drawers useful depth mm	459

Drawer clear dimensions (W x D) mm	600 x 450		

Product-specific benefits

- + Additional storage space and working surface with non-slip, easy-to-clean covers with raised edges all round
- + Ideal for large and heavy stored goods up to 200 kg/drawer with pull-out shelves for flush storage
- + Secure locking option with a choice of hinged doors or space-saving sliding doors
- + Easily adaptable to new stored goods by installing or converting drawers, pull-out shelves and adjustable shelves in 25 mm increments as required
- + Easy to move using pallet truck thanks to the forklift base, even with loaded cabinets
- + General benefits of the LISTA drawer cabinets

OVERVIEW OF LISTA ACCESS SOLUTIONS

KEY Lock

Proven standard locking system

KEY Lock, our standard locking system with replaceable cylinders.

- **Manual opening/locking** with key
- Simultaneously lockable for multiple, as well as different, products with only one key or separately lockable with several keys
- Key availability guaranteed for years

CODE Lock

The modern solution with number combination

When locking with CODE Lock, the key is replaced by a number combination. A simple four to six-digit code is all that is needed to open the product.

- **Manual opening/locking** with number code
- Lock readout and programming with LISTA Access Software (option)

RFID Lock

Ready for the future: the solution with RFID Badge

In addition to the CODE Lock, the LISTA RFID Lock enables opening and locking via standard radio-frequency identification (RFID). It consists of a transponder in the lock and standard mobile RFID badges/cards/tags.

- **Manual opening/locking** via RFID badge or number code
- Most standard RFID badges/cards/tags can be used
- Lock readout and programming with LISTA Access Software (option)

AUTO Lock

The ultimate solution: automatic opening and locking

The LISTA AUTO Lock features the same functionality as our RFID Lock, however opening and locking take place automatically. With LISTA Access Software (option), time profiles can also be programmed in the lock or on the user for time-limited access for increased security.

- **Automatic opening/locking** via RFID badge or number code
- Most standard RFID badges/cards/tags can be used
- Locks automatically after a preset time or at the push of a button
- Lock readout and programming with LISTA Access Software (option)
- Time-limited access programmable via LISTA Access Software (option)
